

Six New Oil Fields Recognized in Kansas

The Kansas Geological Society's Nomenclature Committee, in association with the Kansas Corporation Commission (KCC) and the Kansas Geological Survey, has recognized and named 6 new oil fields in Kansas at a meeting held on July 12, 2018 in Wichita, Kansas. The number of new oil and gas fields recognized in Kansas in 2018 totals 31. This is 7 less new pool discoveries compared to the same period in 2017, up nearly 18 percent.

There were no new "infield wildcat" discovery wells recognized in established fields based on the distance (over one-half mile) from existing production in the field. This brings the total number of new discoveries of all types in Kansas this year (including infield wildcats) to 34. This is 10 less discoveries compared to the same period in 2017, down by nearly 23%.
