

17 New Oil Fields Recognized in Kansas

The Kansas Geological Society's Nomenclature Committee, in association with the Kansas Corporation Commission (KCC) and the Kansas Geological Survey, has recognized and named 17 new oil fields in Kansas at a meeting held on November 2, 2018 in Wichita, Kansas. The number of new oil and gas fields recognized in Kansas in 2018 totals 51. This is two less new pool discoveries compared to the same period in 2017 (- 4%).

There were no new "infield wildcat" discovery wells recognized in established fields based on the distance from existing production in the field (over one-half mile). This brings the total number of new discoveries of all types in Kansas this year (including infield wildcats) to 54. This is one more discovery compared to the same period in 2017 (- 2%).
