

Five New Oil Fields Recognized in Kansas

The **Kansas Geological Society's Nomenclature Committee**, in association with the **Kansas Corporation Commission (KCC)** and the **Kansas Geological Survey**, has recognized and named five new oil fields in Kansas at a meeting held on February 8, 2018 in Wichita, Kansas.

The number of *new oil and gas fields* recognized in Kansas in 2018 totals five. This is two less new pool discoveries compared to the same period in 2017, down nearly 29 percent. There were no new "*infield wildcat*" discovery wells recognized, thus bringing the total number of new discoveries of *all types* in Kansas this year (including infield wildcats) to five. This is three less discoveries compared to 2017, down by almost 38%.
